Laurie A. Rudolph
SRR Specialists

Spalding DeDecker Training Testimonial:

In March of 2019 Spalding DeDecker was due for our annual Confined Space/HAZWOPER training program. We reached out to Ms. Laurie Rudolph at SRR Specialists and are very glad that we chose to do so.

I spoke with Laurie regarding the training, and she mentioned how SRR Specialists' goal is to cater the training program to a company's specific needs. We discussed what type of work we normally do and what hazards we would typically come across on a job site. From there she came up with a training that covered exactly what was applicable to us as well as some extra information that we may have been overlooking before.

We had about 15 people attend the training, and each one had taken something out of it that they had not necessarily considered previously. The training was very effective and very informational, especially given the one day we had available to hold it.

On top of the great overall training, Laurie was very easy to get a hold of and very flexible when it came to scheduling the training. As previously mentioned, we had a one day window to hold the training, and she was able to schedule accordingly and put everything together on a relatively short notice. Everything from the initial contact to the training itself was done in a very professional and efficient manner.
